

Colour Proof Waiver

A PDF proof shown on the computer screen may vary in colour based on the graphics card and monitor used in your system. A Colour Proof is needed as a reference guide to match the colors of the artwork in your project. If you do not want SLI to produce a Colour Proof, we would ask you to sign this form and fax back to SLI with the understanding that SLI will not be responsible or guarantee a color match on the printing of the project.
